Call began at 8:15PM. Topic will be playoffs and championship weekend data management system with the options available being ITSports only, ITSports & Manage to Win (MtW) in parallel or Manage to Win (MtW) only. PointStreak is not an option.

ITSports Update

Not much to report due to little contact with ITSports for quite some time due to individual schedules. No further discussions regarding the playoffs structure. ITSports provided screen shots a few weeks ago and same were circulated to the exec members. Discussion ensued regarding who would input the schedules for playoffs ie LL Exec Members or Division Convenors. Group indicated it would be best for the LL Exec to input schedules.

MtW Update

Info received from MtW was good to go four weeks ago, but unfortunately now there is a problem. Cost has not been provided by MtW as it would be based on what, we as the exec, would be doing to offset costs. Game entry would be by managers and all the preliminary work would need to be done by the exec members.

Further discussion ensued regarding the systems available including ITSPorts used by OWHA last season for playdowns.
